

# Cognitive Procurement

## WHY do you need ignio cognitive procurement?

It saves time, money and improves the overall effectiveness of the procure to pay process. This provides actionable insights resulting in better decision making.

**Process before ignio – Took weeks, there were higher chances of human errors, traditional and post-facto analysis was conducted on sample datasets**

**Process after ignio - Takes minutes or hours, no scope of human errors, advanced analysis and continuous monitoring is conducted on the entire data**

## HOW does ignio cognitive procurement work?

It works as an independent continuous monitoring solution and provides organizations the ability to explore, monitor and intercept the procurement behavior

## WHAT is ignio Cognitive Procurement?

It is a virtual procurement analyst which helps organizations transition from post-facto spend analysis to real-time spend monitoring

## WHERE is ignio Cognitive Procurement used?

It is used along with eProcurement, Enterprise Resource Planning (ERP) or Home-Grown solutions. It consumes raw transaction data from such systems as input and generates cognitive insights as output

## WHO are the key stakeholders of ignio Cognitive Procurement?
